Silicon Valley Rebounds!

- **problem statement –**
- “The business as usual public/private process can NOT facilitate a recovery of Silicon Valley at a **pace required to preserve Silicon Valley’s industrial, educational and bio contribution preeminence** in the event of a regional emergency.”
- **mission statement –**
- Response and recovery require **visible, shareable geo – referenced resources** plus a **fast path public - private working method**. This new means must be resilient for information services and content as well as communications and management functions.

Inter-network the EOC's

Government

- Counties
- Cities

Utility

- Water
- Gas and Electric

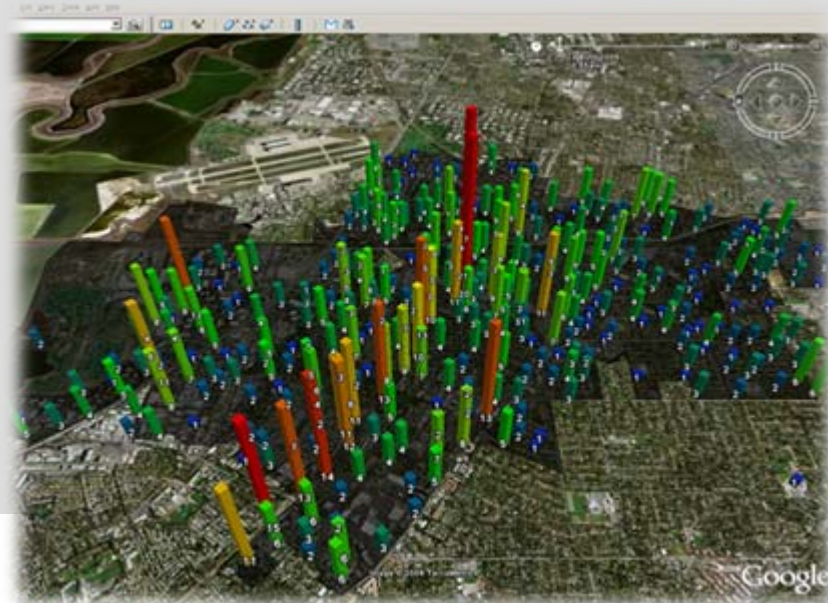

Corporations and Schools...

- Non-government aid and relief

Data

Insight

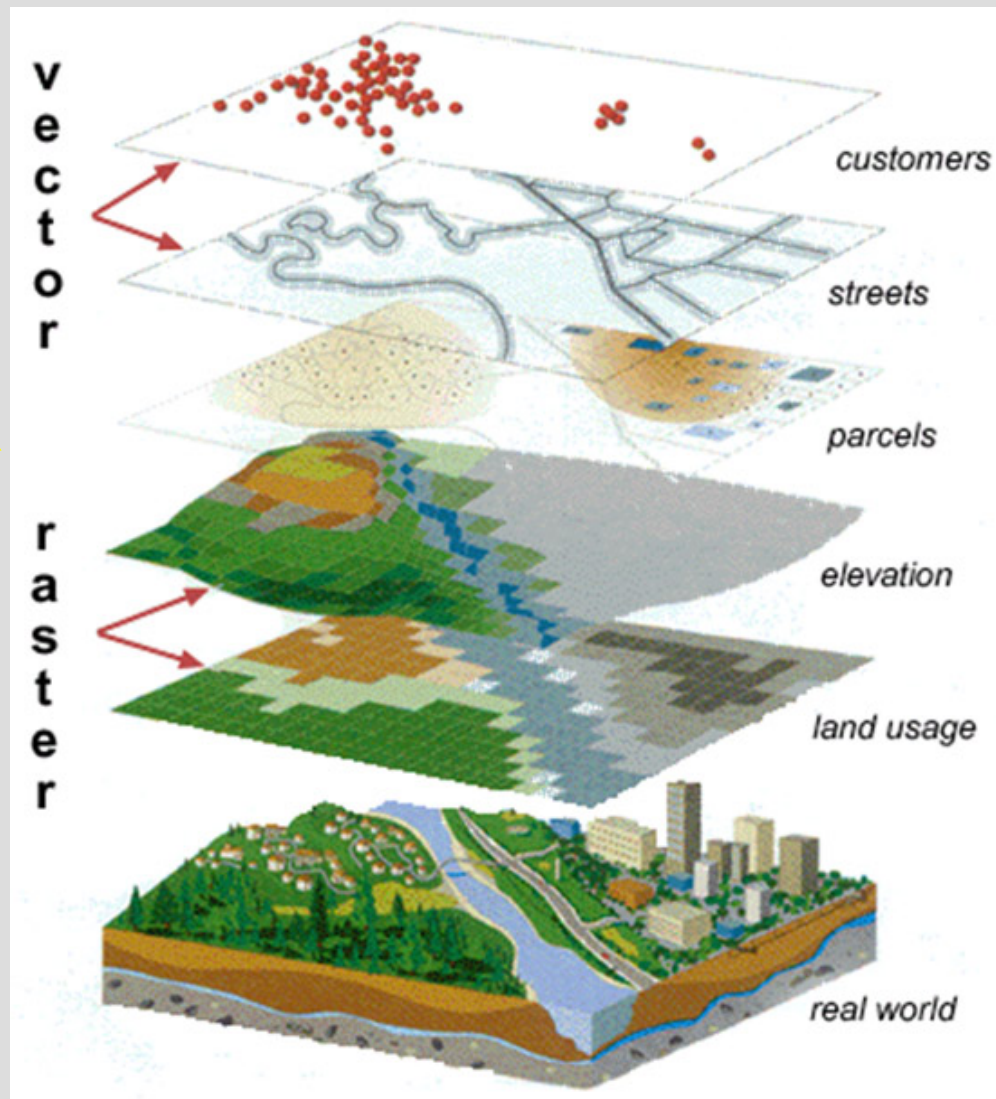

Wireless to the Rescue

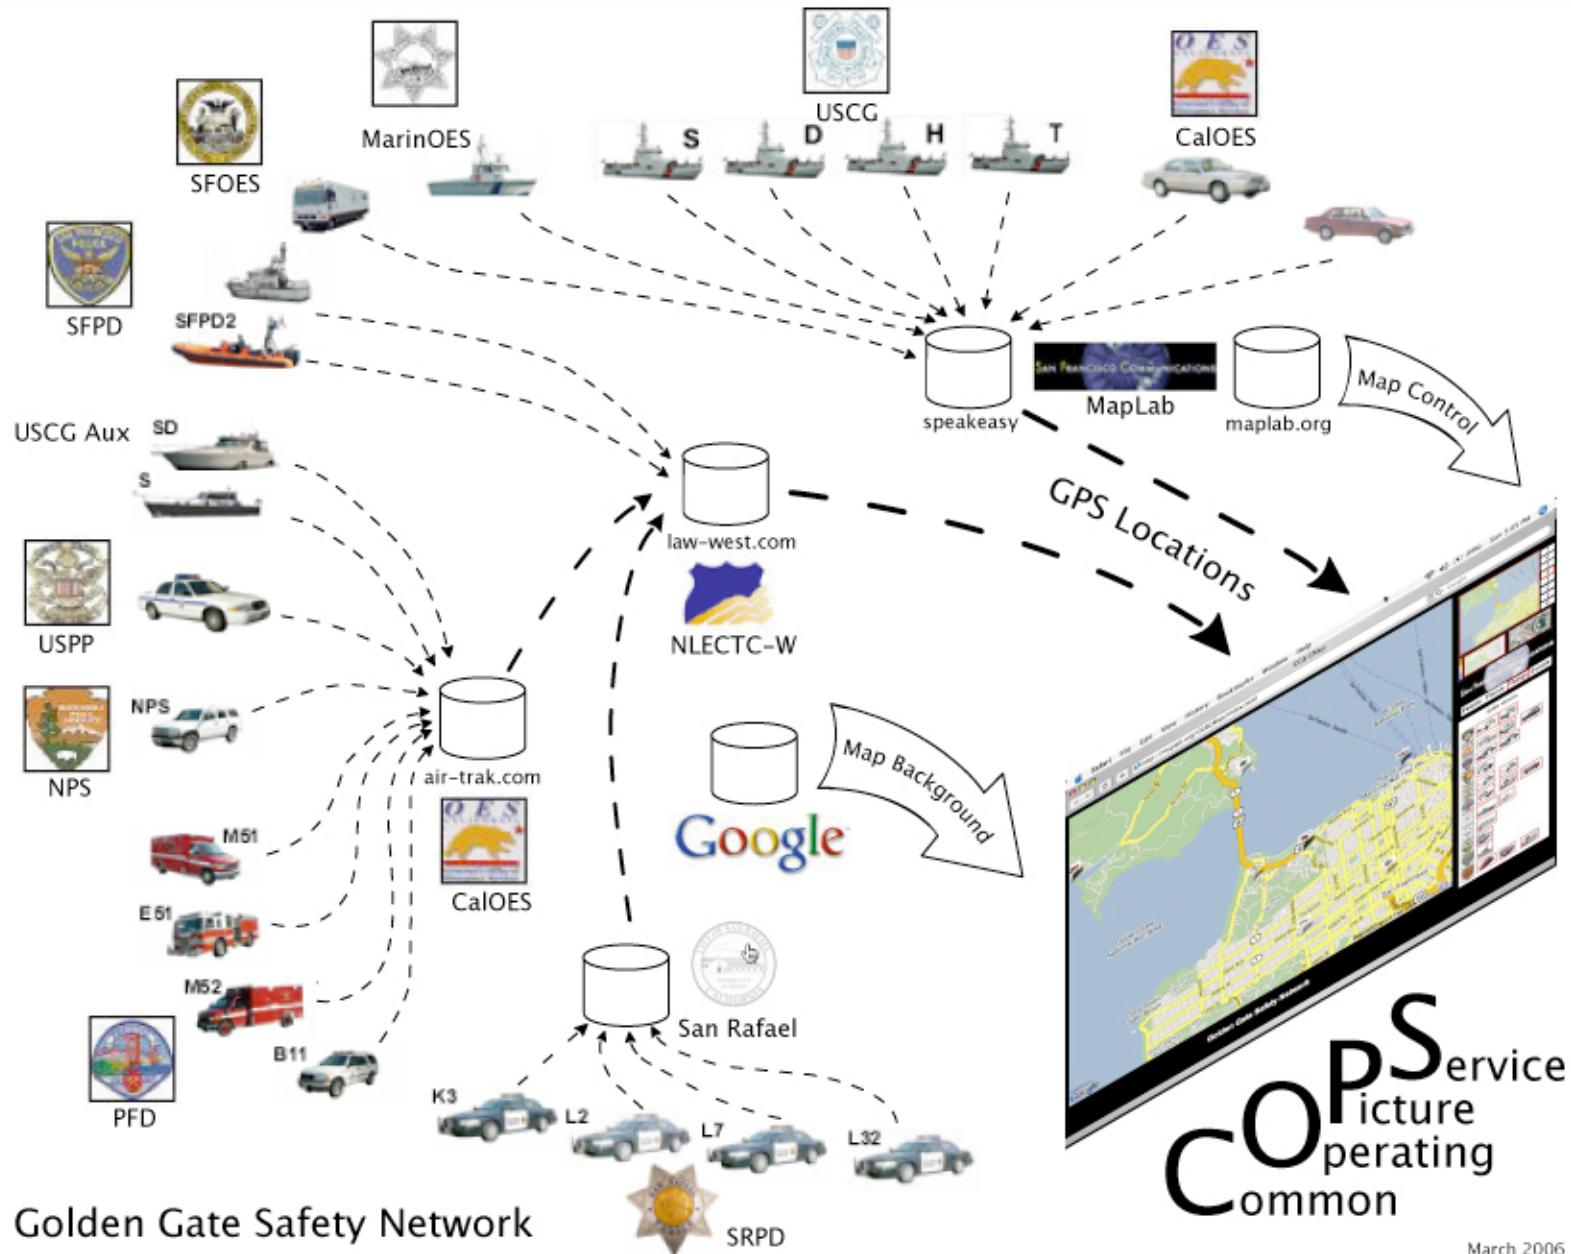

Geo-referenced Information

Resources where?

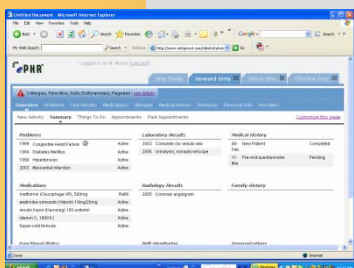

- Scalable - CA
- Time-registered data
- Unlimited info layers
- Right-now images
- Location recording

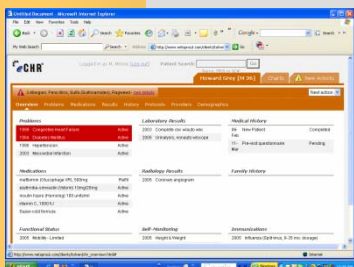

Benefits for Silicon Valley

Benefits for larger communities

Public Sector

Private Sector

- More rapid recovery = less cost,
- less disruption ...>
- Continued ability to contribute to world progress in Silicon Valley strength areas.

Visibility, Leadership, Mobile Response, Management, Rebound
Preparedness saves lives and property damage...
pre-placement of resources speeds recovery

Joint Venture
SILICON VALLEY NETWORK

Prevention – the hidden activity to counter terrorism:

Joint Venture Potential DPI Projects

- Common Operational Picture, based on open software, trained by local experts, information presented by numerous private sector people. Result – the Silicon Valley View – dynamic and scalable
- Disaster Response Center at NASA Ames
- Joint Venture Recovery Fund – Insure the expectable realistically
- Manage a Recovery with Rational Priorities, Region-wide fast-path decisions
- Integrate interoperable communications with network-linked EOC's. Report status in real time even if the main internet is out.

How You Can Lead

- Prepare yourself, family, and business so you are able to help and not a casualty. Look inside your own operation.
- Fund Common Operational Picture by buying training to add data; Add your own resources to the information base.
- Begin discussion to recover from uninsured risks.
- Decide to do a networked link-up of public and private EOCs, including mobile units
